PROFESSIONAL SUMMARY

MERN Stack Developer with hands-on experience building scalable, production-ready full-stack web applications using React.js, Redux, Node.js, Express.js, and MongoDB. Strong expertise in RESTful API development, JWT-based authentication, role-based access control (RBAC), middleware implementation, and responsive UI design. Passionate about writing clean, maintainable code and solving real-world problems.

TECHNICAL SKILLS

Frontend: React.js, Redux, JavaScript (ES6+), HTML5, CSS3, Bootstrap, ShadCN UI, MUI

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, RBAC, Middleware

Database: MongoDB, Mongoose, MySQL, SQL

Tools: Git, GitHub, Postman, npm

PROFESSIONAL EXPERIENCE

MERN Stack Developer Intern (Full-Stack) – Stackup Pvt. Ltd.

April 2025 – Present

- Developed and maintained scalable RESTful APIs using Node.js and Express.js.
- Implemented secure authentication and authorization using JWT and role-based access control.
- Designed and integrated MongoDB schemas using Mongoose and worked with MySQL and SQL for relational data storage, joins, and optimized queries.
- Built reusable middleware for validation, error handling, and request processing.
- Collaborated with frontend teams to integrate APIs with React-based user interfaces.

- Actively worked on a **Live HRMS Platform**, contributing to employee management, role handling, attendance tracking, and HR dashboards in a production environment.
-

PROJECTS

HRMS Platform (Human Resource Management System) – Live Project

- Developed and deployed a live MERN-based HRMS platform used for managing employees, roles, and organizational data.
- Implemented secure authentication and role-based access control (Admin, HR, Employee) using JWT.
- Built RESTful APIs for employee onboarding, profile management, attendance tracking, and employment status updates.
- Designed MongoDB schemas and utilized MySQL/SQL for structured HR records, reporting, and queries.
- Created responsive React-based dashboards for HR operations and employee selfservice, optimized for real-world usage.

PayNest – Banking as a Service (BaaS) Platform

- Developed a secure MERN-based fintech platform supporting user onboarding and dashboards.
- Implemented JWT-based authentication and protected APIs for different user roles.
- Built modular backend architecture for maintainability and scalability.

Amazon Clone – MERN E-Commerce Application

- Built a full-stack e-commerce application with authentication, cart, and order management.
- Designed REST APIs for products, users, and orders.
- Integrated MongoDB for persistent data storage.

Employee Management System

- Developed an employee CRUD system with secure APIs and role-based access.
- Implemented backend validation and clean API architecture.

Chat Application

- Built an authenticated chat application with message storage.

- Implemented secure user login and protected routes.

Blog Application

- Developed a blog platform with protected author access and CRUD operations.
- Implemented role-based permissions for content management.

EDUCATION

B.Tech / B.E. Mechanical Engineering – Anna University
First Class
